

Opportunities for whole school collaboration are plentiful and range from the development of our outdoor areas, to community singing, support of school events and outings and working together in support of charitable causes. Inter-House opportunities promote co-operation across age-groups and the development of the children's social and inter-personal skills

The School Council provides opportunities to develop democratic skills. All children are part of the School Council with an elected representative from each class attending meetings and feeding back to their peers.

St Margaret's celebrates sporting achievement. Visits from athletes such as Amy Williams and aspiring Paralympian Lauren Booth help to promote the values of hard work, commitment & endeavour.

## St Margaret's Preparatory School

## Social Development

Breadth of study through residential trips and educational visits provides the children with vital opportunities to develop teamwork, communication and collaborative skills.

Children are taught to respect people who help us through visits from a range of professionals such as fire fighters, police officers and medical practitioners. We enjoy a close link with Marden Court, a dementia friendly care home.

Safety covers many aspects of the children's development and there is a comprehensive programme which focuses on e-safety, road safety, and personal safety, including who they can turn to for help.
